

## ERRATA

---

**NOTE:** In Figures 2D and 3A–E of the article by Breen et al. [Environ Health Perspect 118:265–272 (2010)], the colors of lines in the graphs were reversed.

In the first line below Equation 3 on page 267, the subscript in the mathematical variable is incorrect; “ $C_{\text{MET,cell}}(t)$ ” should have been “ $C_{\text{MET,med}}(t)$ .” Thus, the in-line variable “is solved for  $C_{\text{MET,med}}(t)$  and substituted into Equation 2. . . .”

*EHP* apologizes for the errors.

These errors have been corrected in the PDF version of this article.
